How To Post Facebook Status Upside Down

(5102-4102   ı   u) u op pısdn sn   s ooq   sod o   o
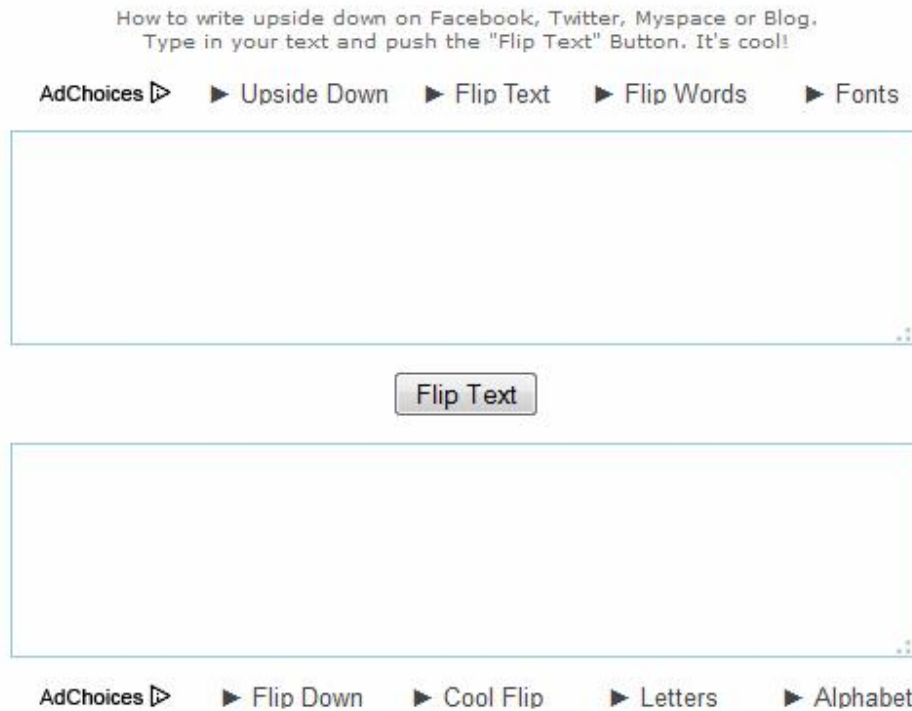

In this tutorial I'll will share with you simple facebook status trick. If you want to post something creative or something cool as your facebook status then this trick will let you post any facebook status upside down. Basically this is a website which allows you to flip your text. So let's dive into it.

Simple Steps to follow:

1. First go to this website by http://www.linkbucks.com/AZW5Z
2. Enter you message or text in text area and click on Flip.
3. Copy the upside down text and paste it in your facebook status or where ever you want to use it. Enjoy!

Check your Facebook account if it's Verified

It is good to know that your account is verified because if it's not then soon or later on you're browsing or sharing new stuff on your wall suddenly it will be closed due verification options.
So let's begin!

Steps to follow:

Step 1- Go to Facebook Developers Website > Tools > Graph Api Explorer

Step 2- Click Get Access Access Token Button

Step 3- Extended Permissions > Tick the read_insights + Get AccessToken

Step 4-Finally Search for the word Verified under the Node: me at the left

So now the textbox will be just like this :
PHP Code:

```
me?fields=id,name,verified
```

Don't Forget to click Submit after the (4) so when clicking submit you will see this :

Quote:{
"id": "just numbers it is your ID",
"name": "your name",
"verified": true
}

TRUE = Verified
False = Not Verified (You need to verify all the needed stuff that Facebook is given)

How To Create Unlimited Facebook Accounts (Without Any Phone Number)

Howdy BLH fans? Many of my users requested me to make an article on how to create unlimited Facebook accounts without any phone number. So here I am fulfilling their wishes. We are not satisfied with only one Facebook account and want to create a few more. Of course we have our own reasons to do so. In my today's article you will learn how to create unlimited Facebook accounts. And guys do you know what the best part is? You won't require any phone number to do so.

Let us start. In order to create unlimited facebook accounts you need to follow some instructions.

Step 1- Download in GoogleChrome:

MASKME (http://www.linkbucks.com/AaumY)

Step 2- Download in FireFox: User Agent Switcher (http://www.linkbucks.com/AaunE)

Step 3- Go to FireFox Browser > Tools > Default User Agent > Choose Iphone 3.0

Step 4- Go To Google Chrome go to mask me extension and here's how you work on it: https://www.abine.com/maskme/faq/

Step 5- You navigate in firefox to Facebook.com you will see Facebook Touch (mobile version), the link should be just like this : m.facebook.com

You will register with the masked emails and all the emails you did are forwarded to your email you made in mask me.

NOTE: To run with your normal facebook account end user agents,

Mozilla-Tools>Default user agent>edit user agent>Select iphone 3.0>delete>OK

Also read: http://blacklisthackers.com/index.php/create-unlimited-facebook-account-without-verification-bypass-facebook-phoneemail-verificationtested/

It means : all the emails are connected into the masked mail inbox! So every account needs a confirm so you will confirm all the accounts with same inbox.Thus you can create unlimited facebook accounts without giving them your phone number.

Get Extra Lives In Candy Crush Saga Easily!(Tested)

Candy Crush Saga is an addictive and adventurous puzzle game with more than 400 levels. With over ten million downloads Candy Crush has become the most popular app, be it in google, apple or facebook. More and more hacks and bugs are being discovered by the developers due to a tremendous increase in its popularity. So guys today I am gonna post something which will surely grab your attention. I will tell you a way by which you no longer have to wait for your lives to get filled up. Neither you have to pay for extra lives.
Just follow the below steps correctly:-

For Facebook users:-

If you are playing Candy Crush via facebook there's a trick by which you can earn an extra life. When you are left with only one life open Candy Crush in a new tab while your previous tab still remains in its place. So now you have two tabs open. When you lose your last life in the first tab, you'll still have one left in the second tab. NOTE:- This trick is not valid for multiple lives.

For Android users:-

 If you play Candy Crush on android just follow these simple steps- STEP 1- Go to Settings on your device. STEP 2- Scroll down to "Date & time"
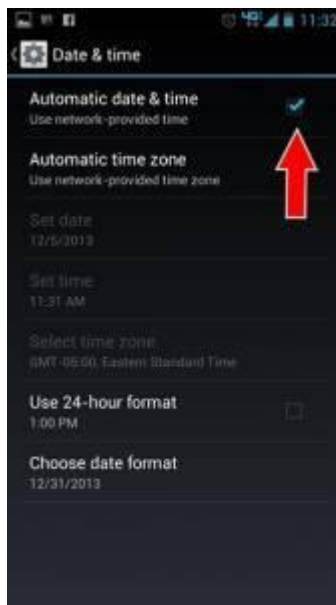

STEP 3- Tap the check-mark next to "automatic date & time"

STEP 4- Tap the "Set time"
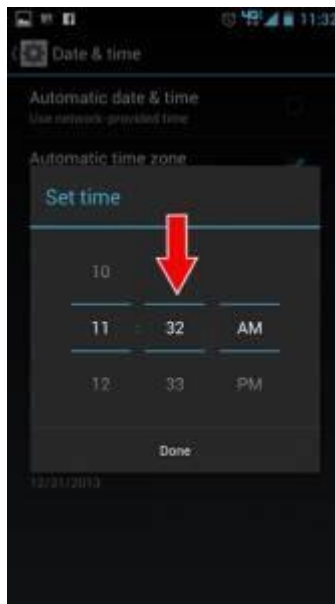

STEP 5- Set your clock ahead 2 hours.

Its done. Check your lives.

For iOS users:-

If you play Candy Crush on iOS, follow the steps below-

STEP 1- Go into the settings of your mobile or tablet device, iPhone, iPod Touch or iPad.

STEP 2- Go into "General"

STEP 3- Scroll down to "Date & Time"

STEP 4- Switch "Set Automatically" to off and then tap the time and set the clock forward 2 hours.
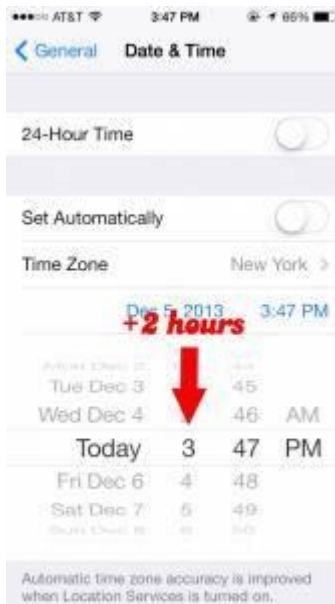

STEP 5- This will refill 4/5 lives!

Now you never have to pay for Candy Crush lives again with this cheat! Simply follow these steps to regenerate a full set of lives in no time. Just remember that after you advance the clock, do not start playing. Go back and change the clock back to the regular time before you start playing or else when you switch it back it will make you wait a very long time to generate a life regularly. Enjoy playing unlimited Candy Crush with this cheat on how to get free lives all the time!!

Top 10 ways to hack Facebook account 2014

How to hack facebook account. With this highly detailed tutorial you all will be able to hack into anyone's facebook account very easily. This tutorial includes 10 methods and everything and all the thought processes which are very important to hack facebook account.

I am writing this tutorial on the requests of my members as they all want only one thing and that is the method to hack facebook. Also, all other tutorials are outdated and no longer

work as they are not including the security updates that Facebook implemented not so long ago. So today in this tutorial i will be listing all methods to hack facebook account, and i will be listing it from top to bottom. So stay calm and enjoy the post from beginning 😊

So let us begin!!

10. Botnets

Botnets are not commonly used for hacking facebook accounts, because of it's high setup costs, They are used to carry more advanced attacks, A botnet is basically a collection of compromised computer, The infection process is same as the keylogging, however a botnet gives you, additional options in for carrying out attacks with the compromised computer. Some of the most popular botnets include Spyeye and Zeus.

9. Man In the Middle Attacks

If the victim and attacker are on the same lan and on a switch based network, A hacker can place himself b/w the client and the server or he could also act as a default gateway and hence capturing all the traffic in between, ARP Poisoning which is the other name for man in the middle attacks is a very broad topic and is beyond the scope of this article.

http://blacklisthackers.com/index.php/facebook-user-can-hacked-access-token-man-middle-attack/

8. USB Hacking

If an attacker has physical access to your computer, he could just insert a USB programmed with a function to automatically extract saved passwords in the browser.
Read more about USB Hacking:

- How To Make Your Own USB Stealer Steal Password Using Pendrive: http://blacklisthackers.com/index.php/how-to-make-your-own-usb-stealer-steal-password-using-pendrive/

7. DNS Spoofing

If both the victim and attacker are on the same network, an attacker can use a DNS spoofing attack and change the original facebook.com page to his own fake page and hence can get access to victims facebook account.

6. Mobile Phone Hacking

Millions of Facebook users access Facebook through their mobile phones. In case the hacker can gain access to the victims mobile phone then he can probably gain access to his/her Facebook account. Their are lots of Mobile Spying softwares used to monitor a Cellphone.

5. Sidejacking With Firesheep

Sidejacking attack went common in late 2010, however it's still popular now a days, Firesheep is widely used to carry out sidejacking attacks, Firesheep only works when the attacker and victim is on the same wifi network. A sidejacking attack is basically another name for http session hijacking, but it's more targeted towards wifi users.

4. Session Hijacking

Session Hijacking can be often very dangerous if you are accessing Facebook on a http:// connection, In a Session Hijacking attack a hacker steals the victims browser cookie which is used to authenticate a user on a website and uses to it to access victims account, Session hijacking is widely used on Lan's.

DRAWABACKS:

- You will be logged out when user is logged out.
- You will not get the password of the user's account.
- Will not work if the user is using HTTPS connections.

PREVENTION:

- Always work on SSL secured connections.
- Always keep a look at the url if the http:// is not changed to https:// it means that sniffing is active on your network.

3. Stealers

Almost 80% percent people use stored passwords in their browser to access the facebook, This is is quite convenient but can sometimes be extremely dangerous, Stealers are software's specially designed to capture the saved passwords stored in the victims browser, Stealers once FUD can be extremely powerful.

2. Keylogging

Keylogging, according to me is the easiest way to hack a facebook password, Keylogging sometimes can be so dangerous that even a person with good knowledge of computers can fall for it. A keylogger is basically a small program which once is installed on victims computer will record every thing which victim types on his/her computer. The logs are then send back to the attacker by either FTP or directly to hackers email address.

DRAWBACK :

Keyloggers are often detected as threats by good antiviruses. Hacker must find a way to protect it from antivirus.PREVENTION:

- Execute the file only if you trust the sender.
- Use online scanner such as novirusthanks.org
- Use good antivirus and update it regularly .

1. Facebook Phishing

Phishing still is the most popular attack vector used for hacking facebook accounts, There are variety of methods to carry out phishing attack, In a simple phishing attacks a hacker creates a fake login page which exactly looks like the real facebook page and then asks the victim to login into that page, Once the victim logins through the fake page the victims "Email Address" and "Password" is stored in to a text file, The hacker then downloads the text file and get's his hands on the victims credentials.

DRAWBACK :

Users nowadays are aware of these type of attacks and one can not be easily fooled using this attack. You need some social engineering to trick someone.

PREVENTION:

- Always check the page URL before logging in. This is the most trusted and effective way one can use to avoid himself from phishing.

- Other way is to use some good Antivirus software which will warn you if you visit a harmful phishing page.
  Even if somehow you have already entered your credentials in a phisher, Immediately Change your password.

How to close someone Facebook account within 24 Hours

What happens to your Facebook account when you die?

If a Facebook user dies, what happens to their Facebook account? Is it deleted after a certain period? Should their friends or relatives inform Facebook that they are dead?Here is a method to close someone Facebook account within 24 Hours. It works 100% but its just for educational purpose. So don't use it on anyone. Once Deleted Profile can never be recovered. Use wisely.

Steps to Close any FaceBook account(s)

Step 1 – Go to this url:

URL: http://www.linkbucks.com/Aauo2
So this is the Url we will use to Report our Victim. This Form allows you to report a deceased person (someone who is dead).

Step 2 – Complete the Fields:

Description:

Full Name: Your Victims Full name(Name last name)

Date of birth: Go at his profile and click at Info tab and get his date of birth.

Account Email Addresses: Do the same thing, go to his profile and click on info tab and get his email addresses.

Networks: Again,go to his profile and click on Info tab and get his networks, copy them and paste in the form. Web address of profile you would like to report: Just go to his profile and copy the link in the address bar.

Relationship to this person: To make more believable select Immediate Family.

Requested Action: Remove Profile

Proof Of Death: This is the hardest part of this form. Now to make a proof of a death just Google in your language a "Death Certificate" or "Certificate of a Death". It doesn't matters from what country you are, just use this Italian certificate and open up photoshop or whatever Image

Editor and just write in a blank field:

Annunciamo il morte di [name goes here]. Save your image to desktop and upload it in one of the Image
Free Hosting like: http://imageshack.us and it's done- Italian Death Certificate:

Additional Information: Write what you want, just write that you are in his/her family and you would like to close his/her Facebook account because you won't like that when he is dead, his Facebook is opened.

Step 3 – Click on Submit and then a message will appear:

Your injury was submitted at Facebook Team its mean that one of the mod's of Facebook will review your report and will do the right decision. It works in most of the times. I closed a few ones now the turn is yours.

Check if someone is blocking you

I was in a relationship so when i broke up with my Girlfriend blocked me on Facebook but i want to check if she deactivated her Facebook Account or blocked me since we don't have any mutual friends and I was not able to make any Facebook account because I need a phone number to verify this.

So I searched the internet and read about Facebook and didn't works one day my friend was working on a software and it is connected with some requests in Graph API and those stuff.

I asked him and knew about Facebook Graph so I worked on it and found this trick till now it works fine !

Steps to Follow:

1- Visit this Website: http://www.linkbucks.com/Aauux

2- After the / Add the username of the account Example :

PHP Code:

https://www.facebook.com/rulingeveryheart
So the username after the / is Aarav

3- It will be like this : Website http://graph.facebook.com/rulingeveryheart

<u>Pictures</u>

<u>If the Account is online and works activated it will be like this</u>
<u>So the user is blocking you.. I'm sorry</u> 😊♪

```
{
    "id": "4",
    "first_name": "Mark",
    "gender": "male",
    "last_name": "Zuckerberg",
    "link": "https://www.facebook.com/zuck",
    "locale": "en_US",
    "name": "Mark Zuckerberg",
    "username": "zuck"
}
```

<u>If the account is not online and deactivated</u>
<u>So the user is not blocking you.. I'm not sorry</u> 😜♪

```
{
    "error": {
        "message": "Unsupported get request.",
        "type": "GraphMethodException",
        "code": 100
    }
}
```

More Information From Others :

You could also do this a easier way by copying the URL, and logging out, if it's there then you're blocked, if it's not, then they deactivated.

How to Flood Facebook Wallpost/Comment/Message

I want to show you my tutorial on how to Flood Wall posts, Comments and Message in Facebook.

Things to be noted:

1) This is my 1st Tutorial so please don't flame.
2) In this method, you need to add your victim as a friend or else you will not be able to Post on his wall, Comment and Message him.
3) By doing this method, Facebook can block you from posting comments and wallposts, so I suggest use a dummy account or use this with care and limitation.

Requirement:

1) A Facebook Account and a Victim (of course)
2) Auto-Clicker (In this tutorial we will use Auto Clicker v2.2 by Shocker)
Download: You can download it at the Official Site : http://www.linkbucks.com/AauwQ
NOTE: Detections are false positives. If you don't trust me you can run it sandboxed.

3) The most important is BRAIN and COMMON SENSE.

INSTRUCTIONS:

1) Login to your Facebook account. Then after logging in, open another tab/window then go to "m.facebook.com" (without quotes)
2) Go to friends, then type your victim's name then click Search. Now go to your victim's profile.
3) Now for the third step, I will cut this into 3 parts, Wallpost Flood, Comment Flood and Messaging Flood.

For-Wallpost Flood-

1) Open Auto Clicker. Change the "Number of Clicks" to "9999". NOTE: Leave all the settings as it is exept the "Number of Clicks".
2) Put your comment on the textbox. Then press F2. NOTE: Don't put your cursor on the "Post" button yet. Just place it in a blank space. Now after pressing F2, you will see the countdown of the Auto-Clicker at your taskbar.*see picture.
Picture

WARNING: Potential SPAM or INFECTED LINK PHOTO

Autoclicker Countdown

3) Now after you saw the progress of click at the taskbar (see picture) place your cursor on the "Post" button.
4) Now leave your cursor on the "Post" button while the Auto-Clicker runs. Leave it for at least a minute.
5) Finished. You've just flooded his Wall.

-Comment Flood-

NOTE: In this tutorial we will Comment Flood a profile picture. But you can also use Comment Flooding in Wallposts and other posts/pics/vids that can be commented on. Just use your common sense on how to do it.

1) Open Auto Clicker. Change the "Number of Clicks" to "9999". NOTE: Leave all the settings as it is except the "Number of Clicks".

2) Click your victim's profile picture.

3) Pick a photo you want to comment on. (You can use Next and Previous Button to Navigate to his other Profile Pics.)

4) Put your comment on the textbox. Then press F2. NOTE: Don't put your cursor on the "Comment" button yet. Just place it in a blank space. Now after pressing F2, you will see the countdown of the Auto-Clicker at your taskbar.*see picture.

How to scan your Facebook account

In an earlier topic we've discussed a lot about Tips to prevent hacking controlling about the security. Today I've found a useful tool to scan your Facebook account and to adjust your settings. As you all know virus is a program that when run, has the ability to self-replicate by infecting other programs and files these programs can have many effects. The word virus has incorrectly become a general term that encompasses Trojans, worms, and viruses. Similarly there areome apps in facebook which are designed by leading antivirus

companies.
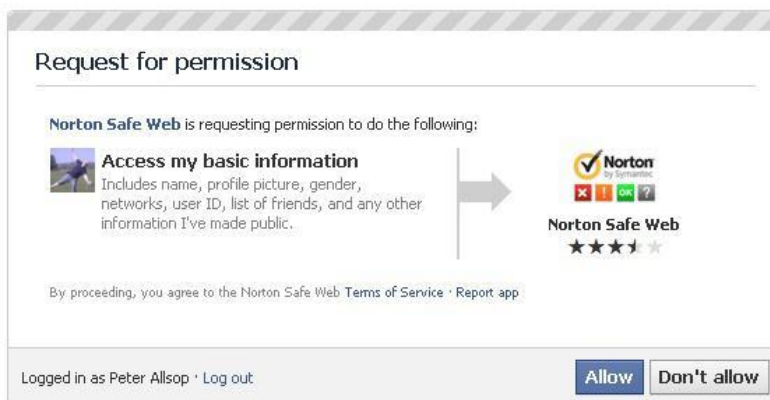

- SECURE.ME(Antivirus in Facebook)

secure.me works like antivirus for social networks and apps. Using sophisticated algorithms, we identify posts and photos that pose a threat to your privacy, security and reputation. In addition to your own Facebook profile, we also monitor your friends network to keep you safe and secure.
https://www.secure.me/en/sign-up/ to use SECURE.ME
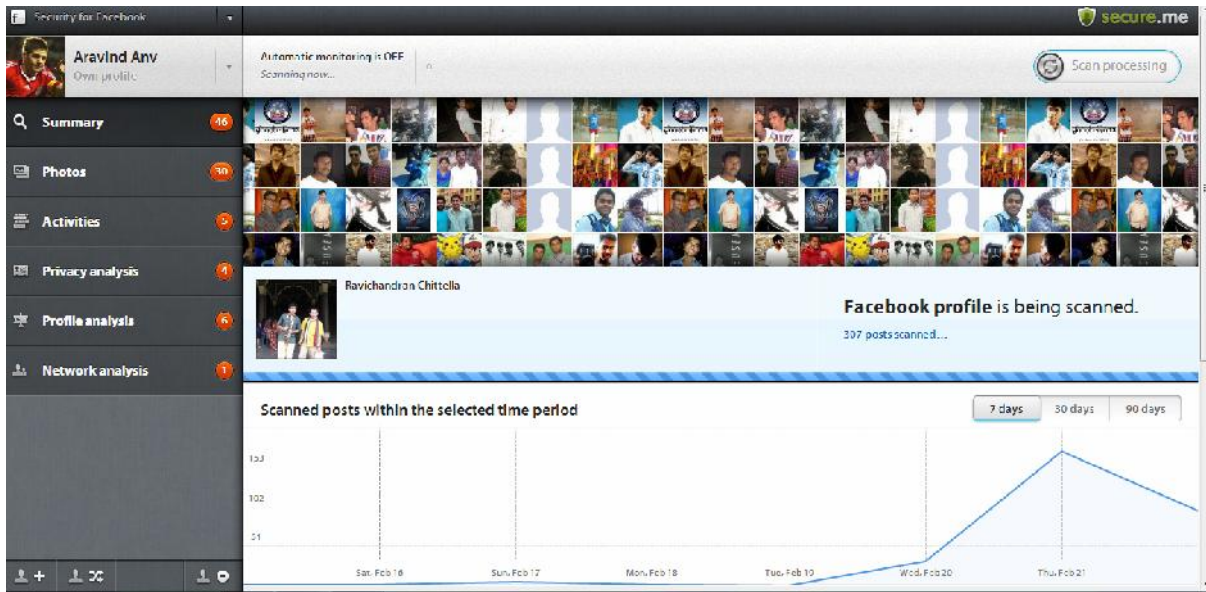

- NORTON Safeweb for FACEBOOK

Safeguard against malicious URLs by scanning your feed using Norton Safe Web. Protect your friends by advising them of malicious URLs you might have in your feed.
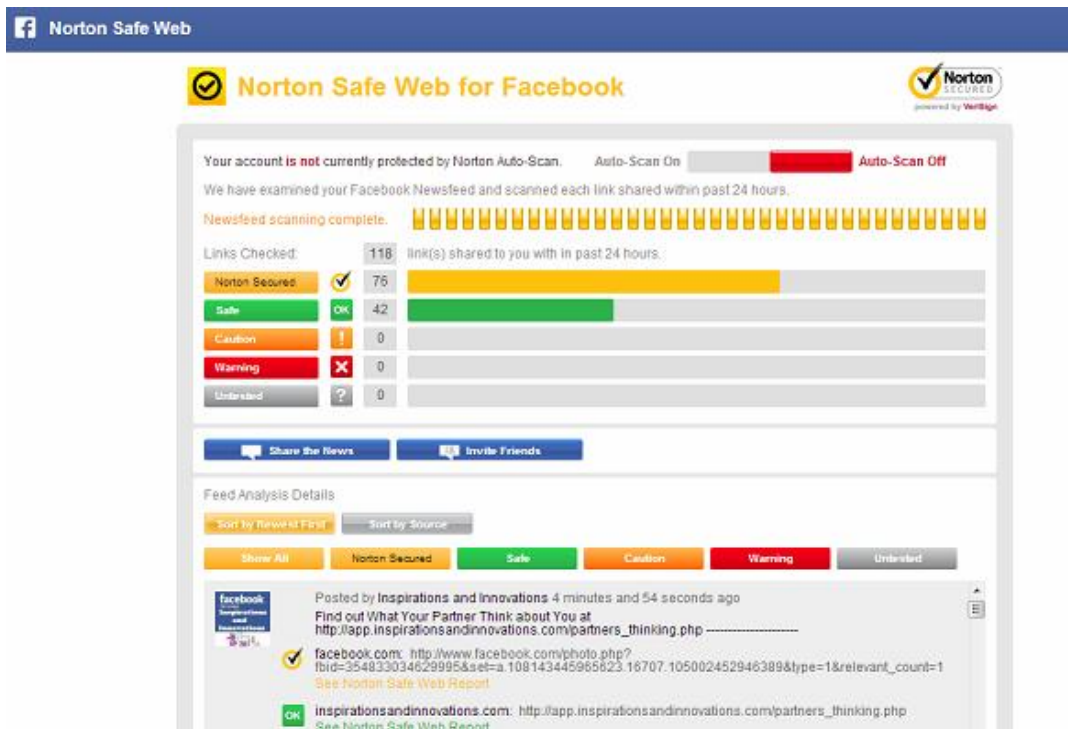

https://apps.facebook.com/nortonsafeweb/ to use Nortonsafeweb for facebook

- BITDEFENDER SAEGO:

Bitdefender Safego protects your Facebook account from all sorts of e-trouble: scams, spam, malware and private data exposure. Safego also keeps your friends safe. Safego also keeps your online friends safe and close.

How to Hide SEEN Facebook Chat Messages And Stay Undetected

Want to avoid annoying people on Facebook Chat? In the past you could do that just by not replying and feigning not having seen the message, but ever since Facebook has implemented the read receipt feature on Facebook chats, that excuse doesn't work anymore.

There is no default Facebook chat setting to disable this 'feature', but we've found a workaround – a browser extension to remove the 'Seen' notice. With this installed, the person you are chatting with will not be able to tell when you have 'seen' their message.

Simple 1-Click Installation:

To not let people know if you've read their Facebook chat messages, go to http://www.linkbucks.com/AauzO and press the green Get Chat Undetected button. It will then detect what web browser you're using.

If you're using Google Chrome, a Chat Undetected installation file will be downloaded into your computer. Close Google Chrome, run that installation file and you're done.
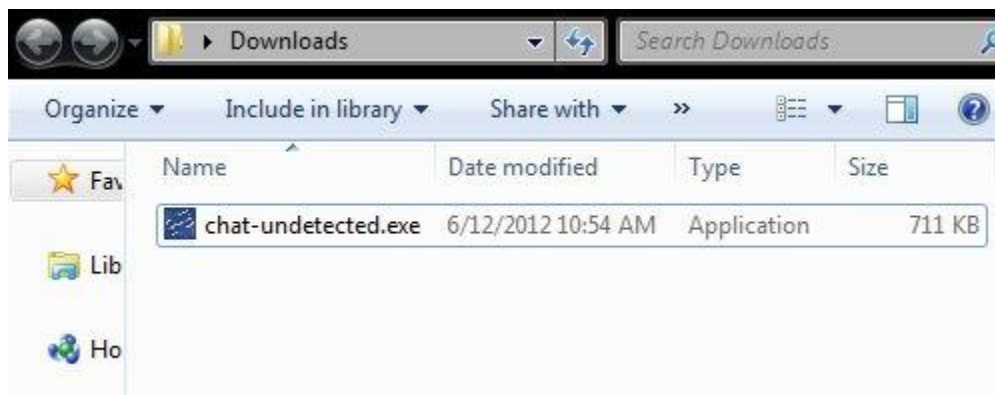

If you're using Mozilla Firefox, an add-on notice will appear confirming the installation of Chat-Undetected. Click on Install Now to complete the installation.

Software Installation

⚠ **Install add-ons only from authors whom you trust.**

Malicious software can damage your computer or violate your privacy.

You have asked to install the following item:

Chat Undetected (Author not verified)
http://app-static.crossrider.com/firefox/14917/0/0/0/chat-undetected.xpi?ver=0.85.36

[Install Now] [Cancel]

Now you're all set, the irritating 'Seen' status is now gone and the friends you are chatting with will not be able to tell if you have 'seen' their message.

Uninstalling Chat Undetected:

If for some reason, you want to uninstall Chat Undetected, you'll have to navigate to the settings of your web browsers.

For Google Chrome, go to Settings > Extensions to disable or uninstall Chat Undetected.
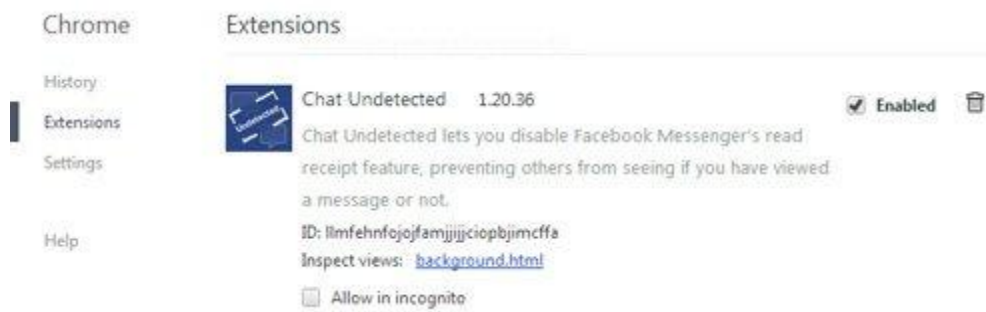

For Mozilla Firefox, go to the Add-ons page and you'll be able to disable or uninstall Chat Undetected under Extensions.

Tips to Identify Fake Facebook Account Easily

Fake Facebook Accounts is proving out to be a new Trend on Facebook. Probably 20-30% of total Facebook Accounts are fake or even more, This Number is anticipated to be increasing in Future. Fake accounts on Facebook are mainly created with an intention to Spam all over Facebook and Spread Virus. Many people Create Fake Girl's Profiles to Dupe some innocent Facebook Users too.

It's Sad that Facebook Can't Identify Fake Facebook Account and Delete them all Manully, and One Should not expect it from Facebook because of obvious Reasons. But yes they will Definitely Block your account if you send lots of Friend requests to Unknown People and if you post or Comment Spammy Links over and over again. Facebook Catches you and then next time when you try to Login again, it asks you to Identify Photos of Friends, This is where Fake Account Users Get Caught.

But This Don't Stop Spammers to Create another Fake Facebook account, So in this article we will Discuss Some Tips that will Help you to Identify Fake Facebook Account easily, So that you don't fell in their Traps, Report that Account to Facebook which will Help to Make Facebook Safer to all of us.

4 Tips to Identify Fake Facebook Account

1) Profile Picture:

First Thing we see about any Facebook account is their Profile Picture, If you Find any Facebook Account on your Friend list suspicious, First thing you will do is Use Reverse Image Search. This helps you find out if Similar Pictures are available on Internet. First Download the Profile Picture of the account you find suspicious

Goto Google images Click on Camera icon which says Search by image, Click on Upload an Image, now choose the Picture you had downloaded earlier, Now once the uploading Completes, Google will show you Similar Images that already exist over internet.

2) Timeline

The Facebook timeline of a Facebook accounts says a lot about that Profile. Most Fake Profiles have "Female" as a gender, this doesn't mean all facebook accounts with "Female" Genders are Fake, and There are many other things to Identify Fake Facebook Account.

if thier photos folder shows only 1 or 2 Pictures that too of random Celebrities then probably its fake.

if the Person does not update Status, or if he does, the Comments does not read like his Real friends or the profile does not comments on others status,then its likely to be a Fake profile

The "About" tab will Give you More information about the Profile, if the "About" tab don't show you any info about the persons profile then thats an indication about fake profile

3) Wait for 1st january:

This is kind of Funny, Why Would one Wait for 1st jan to Identify Fake Facebook Account, Well Fake Profile Makers Most Probably Enter 1st jan as thier birth date while creating Fake account. So on 1st Jan, Facebook will Show you People who have birthdays today. Go through that list and Unfriend them if you dont know them Personally.

On 1st jan 2014, i was shocked to see 28 people Having thier birthday, Guess what i performed the above Proccess.

4) Girls Profile :

Most of the Fake profiles are created with Girl Identity and with a Beautiful face as a Profile Picture, You may even find Cell phone Number, Girls Hardly will Share thier Contact number in Public. A girl Profile with Lots of Friends and Followers indicates a Fake Profile.

These were some tips to Identify Fake Facebook Account, which i wanted to share with you all, if you find any fake profile then you and your friends can report it to facebook.

New Facebook Trick to Send Friend Request Even If You Are Blocked

How To Send Friend Requests On Facebook When You Are Blocked?

Facebook is a great social networking website through which we can stay connected with friends, relatives and other people. But Facebook does not allow to add strangers as your friends. You might have gone through a stage at least once in your Facebook account when a message appears i.e. your friend request is blocked for 1 day, 3 days, or even 30 days. You can not send friend request on Facebook to anyone whether you know him or not when you are blocked. This is because Facebook doesn't let to send friend request to unknown people and considers it as spam and therefore temporarily disable sending friend requests when you violate its rules. This is generally done to secure privacy of people and some people by adding strangers as their friend make misuse of that thing.

However, sometimes you may even get blocked when you send friend request to known people but there are a lot of friend requesting awaiting approval pending already. I have also gone from this same stage, and feel helpless that we can't send friend request to dear friends. So today i will tell you an easy trick with which you can send friend request even if you are blocked.

With help of this trick you can send 1000 s of friend requests even if you are blocked. So without wasting time let's start how this trick works?

How To Send Friend Requests On Facebook When You Are Blocked

If you are going to add some unknown person then you need the email address of that person to whom you are going to add. After you get the email address of the personal whom you want to send friend request either from his profile or any other way, follow these steps.

www.blacklisthackers.com

1. Firstly Goto http://www.facebook.com/?sk=ff

Here you will find a place to add a friends through their Emails based on the different Mail Services. But, if you're thinking of adding too many people then it would be better that you create a contact file.

If you don't know the easiest way to make contact file then follow these steps.

a) Open new text document (.txt) in notepad.

b) Add all the email addresses separated by a comma (,).

c) Now save that file with the extension .vcf

Now this is your contact file.

2. Upload this file to Facebook. and you will be prompted to send friend request.

NOTE : If you don't know how to upload contact file then follow this step.

http://www.facebook.com/?sk=ff

Go to this link! In that the last option is of 'other tools' in which you will find the next option to upload the file!

3. Click "OK"and You're done.

Simple yet effective! Your friend request would be sent to desired people.

If you are not blocked from sending Friend Requests but still you get warnings like 'This Friend Request Can't Be Sent' then you can refer another trick which will help you in bypassing this error.

Trick To Send Facebook Message from Someone's Profile To Other's Profile

Hi Friends, It's not hacking, but it's got enough spoofing in it to make you a hardcore hacker in front of your friends
So ,today I'm goanna show you how to send messages on facebook from someone's profile to some other.

Step 1: First off you will need to pick 2 people from your friends list. One will be the inbox sender and one will be the receiver. Lets say we picked personAfor the inbox sender and personBfor the receiver.

Step 2: Since personAis sending the inbox we need to get his Facebook login email. Go to their profile and click on about.. wait.. what's this? Their login email is hidden? Well we're going to have to use something else to get their email.. hmm.. I got it!

Note: Their login email is not their @facebook.com email.

Step 3: Since their email may be hidden we need to use something else to get it. Go to Yahoo.com and login with Facebook. Once you have set it all up click import contacts from Facebook. Boom, you have almost everyone in your friend lists email address. Search for your inbox sender and copy his email address. Lets say Napster's email is personA@yahoo.com

Step 4: Head on over to http://emkei.cz/
This is a spoof email sender and can send an email to anyone as anyone. Where it says 'From name:' and 'From email:' put the senders email address. So it should look like
From name: personA@yahoo.com
From email: personA@yahoo.com

Step 5: Now you must find the receivers @facebook.com email to receive the fake email in their inbox. Head over to the receivers Facebook profile and click on about, and copy their @facebook.com email.
Lets say Monster's @facebook.com email is personB@facebook.com

Step 6: Go back to the email sender and where it says 'To:' add the Facebook email address. To: personB@facebook.com

Step 7: Do not write anything in 'Subject:' just go down to 'Text:' and add what ever you want to send to the person.
The page should look like:
From name: personA@yahoo.com
From email: personA@yahoo.com

To: personB@facebook.com
Subject:
Text: type your text
Now fill out the Captcha and click send.

You have now sent an inbox from your friends account to your other friends account!

How to make a Single name Facebook account

Facebook ensures not permit single name ID. So if you still want to make a single name ID

<u>Trail these steps:</u>

This Trick is working In "Mozilla Firefox" so try it on Mozilla. Firstly Change your Browser Proxy Manually use one of the proxy from below given.

How to Use Facebook app for Windows 8 And 8.1

The interface of the Facebook app for Windows 8 And 8.1 is quite similar to the other apps developed by Microsoft for Windows 8 And 8.1 as you get a sidebar at the left hand side

which will come with tabs which will show you the notifications, news feeds, check ins etc. On the right hand side of your computer screen you will see all your online friends just like the way you see in Facebook if you are using a web browser to access it. In the center you will see all the status updates which are made by your friends, photos and videos shared by your friends and all the notifications made by the pages and groups which you have liked.

Using this app all the notifications which you receive and tagged status updates will be displayed on the Windows Start screen. Just like you used to have group conversations while you were using Facebook in a web browser you can have that here too. Share pictures, videos and update your status easily with the help of this Facebook app for Windows 8 And 8.1

This app is developed by Facebook and not by Microsoft. If you want to use Facebook on your Windows powered mobile phones you can download the Facebook app for Windows Mobile phones from the Windows store. Facebook has also started a beta testing program in which users can test the upcoming versions of Facebook app before the official launch and tell if there are any bugs present in the software.

To download Facebook for Windows 8 And 8.1 visit the Windows Store and follow the instructions you get on your computer screen.

How to Prevent Facebook Accounts from Being Hacked – Basic tips

There are a lot of ways to lose control of your Facebook account. You may get hacked and ultimately loose Control over your facebook account

Certainly this is not the end of the world, but be aware that you can also be the victim of an

attack by malicious software's and hackers causing much more damage on your Facebook account. It is very important to Prevent Facebook Accounts from Being Hacked. Prevent Facebook Accounts from Being Hacked Indeed, while no software installed on your local system, there is nothing that your local antivirus can detect and your account may be hacked in one-of- hand trick, leading to all sorts of hassles and problems. So today in this article we will discuss some Basic Tips to Prevent Facebook Accounts from Being Hacked.

Tips to Prevent Facebook Accounts from Being Hacked

1)Application Permission

Whenever on Facebook you answer a quiz , install a Facebook game, or add any application , you will be forced to go through an intermediate screen showing what the permissions the application needs . These permissions can include almost anything, which may also include full access to your Facebook account , even when you're not connected.

In other words, if you do not carefully read the permissions required , you might end up giving more than just personal information, so beware next time and Prevent Facebook Accounts from Being Hacked!

2) Spammy Video links:

Also Beware of videos on Facebook, Spammers are targeting Facebook to Spread links of Spammy videos, Which on your click redirects you and takes control of your facebook account to Spam on other facebook comments, you might not be even aware that you have commented so and so thing on so and so place.

3) Download Notification:

Sometimes when you start a video , you receive a notification that you need to install or update a codec , which is necessary and essential to watch the clip.
That may be true, but its often said that codec is actually a Trojan horse . For those who do not know , be aware that antivirus program is blocking it , although it could still slip through the net and suddenly be harmful for you. So be very smart when you come accross this situation and Prevent Facebook Accounts from Being Hacked.

4) Message from Facebook:

If you own Popular Facebook pages, then you may even receive Messages with names like : Facebook team, Security team, Facebook Security, etc, etc.

The Message would so legit that you will be Forced to click on Some link, Which are actually Cookie stealing apps and eventually you may end up loosing your facebook account so better ignore that message and Prevent Facebook Accounts from Being Hacked.

No Facebook team will never Send you such messages, so Don't forget to Report that message.
Protect Yourself:

Facebook continues to work on security even within its platform, but the social giant can not help you to provide your personal information to play a game or a quiz . In addition, a local antivirus will not prevent this error.

Ultimately it is up to you to pay attention and Prevent yourself:

Add your phone number and Change its privacy to Only me, So Even if there is any problem in your facebook account you may easily get it back by making facebook send you Code to your Mobile. And Changing your Phone number Privacy to Only me Will make sure that other people will not be able to see your Phone number.

Add Security Question as a Secondary option to get back your Facebook account. Choose a Question, Answer to which only you know. or add any other Unique answer which nobody knows but make sure you are able to remember it.

Add People as Friends that you know personally, many a times people on facebook adds many other people who they don't even know by their face. Facebook asks you to identify Friends in which they are tagged in.

Turn on Notification when you log in to your facebook account, so whenever you login, you get a mail from facebook with information about time, date, Operating system and Browser.

Change your Password Frequently, It is said that you must Use your Password as your Toothbrush. So keep changing it frequently to Prevent Facebook Accounts from Being Hacked

so these were some Basic Tips that Facebook users must Consider in order to keep their facebook account secure and safe. I hope this helps.

6 Awesome New Hidden Things Of Facebook

Here are some awesome things to do on Facebook, which you might not know. According to latest statistical data, Facebook is now 600 million people strong. This means that if Facebook existed as a country, it would have been the 3rd Largest Country after China and India.
Although we all like sticking to Facebook for several hours talking and seeing what our friends are doing, the Facebook team is quietly adding new features to it which many people, for sure, don't know about:

1. Friendship Page

Friendship Page is a feature where you can see friendship between yourself and a friend of yours. It neatly displays the time since you both are friends and things that you've done together such as Wall posts, comments and things in which you both are commonly tagged like photos, events and status updates.
Type this URL : -
http://www.facebook.com?and=
in your browser to see it yourself.
Replace and = with their respective Facebook Profile IDs.

2. Download Your Facebook Information

This tool is quite handy, in case you want to have a copy of all your photos and videos that you have uploaded, facebook gives you an option for this. Moreover, you can have all your posts on your wall, messages, your friends list and some other content in a a simple, browseable archived zip file.
Visit your Account Settings Panel and click on "learn more" beside download your information text.

3. See Your Facebook Impact

In Simple words, your Impact is the number of people that you've brought (referred) to facebook. Visit Facebook Impact to see your impact.

4. Facebook Photo Badges

You might have seen facebook fan-page badges with a Like button on several blogs before. Facebook provides similar badges for your latest photos that you can embed anywhere you wish. You can also choose the no. of photos that it'll display and Layout type. Visit Photo Badges to create your own badge.

5. Friends Phonebook

Facebook knows how important Friends are to you, so it provides you a phonebook with contact details of all your friends as well as contacts that you've imported from your phone in a single page. This is surely a good backup in case your phone's contacts get erased by a mishap. Visit your Phonebook Page.

6. Facebook Chat Smileys

There are over 26 smiley that you can use on Facebook Chat. While you may have known about many of them, some still remain very less known. Here's a quick list of them: Notice the first smiley is a face, he is Chris Putnam, a Facebook Engineer and the developer/programmer of Facebook chat.

Invite all Facebook Friends for Facebook Page

Selecting & inviting all of your friends in an event can be a tedious task, especially if you have more than 1,000 friends to send invitations to.

Luckily, this trick that allows users to select/invite all of their friends in an event or an app – with just one click.

Steps to follow:

1)   Open Firefox and go to your Facebook page to invite all friends to like your page.

2)   Select "All Friends" instead of "Recent Interaction" so that you can invite all friends to your page. Scroll down till all of your friends are shown in the page.

3)   Press Ctrl+Shift+K and a small window will appear at bottom.

4)   Paste the below code in it and click enter.

How hackers hack Facebook Account & How to stop them

Facebook is, undoubtedly, the most popular social networking website with more than 500 million active users. Due to its popularity, many hackers (or should I say crackers?) are actively involved in hacking Facebook accounts of unsuspecting users. This article outlines the many strategies that such hackers use to gain access to Facebook accounts of hundreds of users each day and how you can stop them from hacking your account.

Facebook is one of the prime target of hackers!

Email Address Hack

I have always been puzzled by Facebook's leniency in this matter. All a hacker needs to do is know your email address and he will be displayed a confirmation showing your name even if he enters the wrong password. How easily a hacker can then hack your Facebook account if

he 'guesses' your password (if you use a weak password) or answers your security question! This is something I hope Facebook improves on quickly. Until Facebook does so, here are some tricks you can use to protect yourself from this vulnerability.

How to safeguard your Email Address?

Just follow these steps:-

1.   Hide your Email Address from everyone by going to Edit Profile>Contact Information>Clicking on the icon beside your email address> checking 'Only Me'.
2.   Change your primary email address to a one that is only known to you by going to Account Settings>Email> and changing your primary email to the new one (known only to you) and removing your previous email address.
3.   For additional security, when in Account Settings, check 'Secure browsing' and 'Send me an email when a new computer or mobile device logs into this account' and click Save.

A hacker at work!

Phishing

Phishing is one of the easiest ways to trick users into giving out their login credentials. All a hacker does is setup a webpage similar in design to that of the Facebook homepage, attach a server sided script to track the username and password entered and store it in a log. Sending people emails stating that someone tagged a photo of them on Facebook in the same format as Facebookand giving a link below to the phishing website further reduces the chances of it being detected as a fake. Sometimes, spam Facebook apps, like those promising to tell who viewed your Facebook profile, automatically post links to phishing websites. A new trend amongst phishers is creating Facebook look-a-like widgets for stealing user's login credentials.

How to prevent yourself from being phished?
At all costs, avoid clicking on suspicious links. Moreover, always check the URL in the address bar before signing in. Avoid logging in through various "Facebook widgets" offered by websites and blogs. Instead, use Facebook's homepage to sign in. Always try to use Safe Search while searching. If you do manage to get phished, report the website so that others may get a warning before visiting it.

Keylogging through Keyloggers

Keylogger is a type of computer virus that tracks key strokes. Keyloggers can be installed remotely on a computer system by a cracker to record all the activity that is going on the victim's computer. Keylogging gets more easy if the hacker has physical access to the victim's computer.

How to stop keyloggers?

Install a good antivirus and update it frequently. Do not click on suspicious links and avoid downloading illegal software. Also, avoid installing free toolbars and other such spam software. Always scan third-person's flash and pen drives before using them on your computer.

Social Engineering

Social engineering involves using any trick to fool the user into making himself vulnerable to exploits. This could involve anything from sending spoof emails, pretending to be from Facebook, telling you to change your password to 12345678 to a hacker maliciously getting out the answer to your Security Question in a friendly chat or discussion.

How to prevent yourself from being socially engineered?

Stay aware during chats and discussions. Use a tough security question, preferably one whose answer you would never disclose to anyone. Moreover, Facebook, or any other company for that matter, will never ask you to change your password to 12345678 or do something as silly as asking you to send out your login details to prove that you are an active user. Always think before taking actions and your e-life on Facebook will be safe from hackers looking to hack Facebook accounts.

How To Post In Multiple Facebook Groups In Single Click:

- First of all you need to join lots of facebook groups related to your blog niche.After joining wait for admin approvel to become a member of group.
- After geting approvel from groups admin we have to collect the facebook e-mail addresses of joined facebook groups.
- Some groups prvide their facebook e-mail address in their group info.Otherwise we have to find the username of the group.We can easily get the username of facebook groups by opening them into our browser.After opening groups you can see group address on our browser address bar.It will something like below link.

- Copy the username of the facebook group and paste them into notepad or wordpad.
- Now its time create facebook groups e-mail address from their usernames.We just need to paste the username just before @groups.facebook.com.Now facebook groups e-mail address look like below e-mail address.

 UserName@groups.facebook.com

- Use above steps to create e-mail address for all joined groups and don't forget to seperate them with commas.After creating e-mail addresses for all groups save them into notepad,wordpad,MS Word etc.

How to Find Out Facebook Fake Profile Pictures
FAKE PROFILE PICTURE,Hello,There are definately a variety of fake Fb profiles on hand out there. Numbers launched from Fb themself signifies that eighty three million fb money owed are faux – that's higher than your entire assortment of individuals dwelling in France and the Netherlands mixed. An estimated 6-7% of all Fb bills are pretend. Pretend autogenerated profiles present the creators of those the opportunity of spamming your wall with bizarre content material subject material and likewise bloat the gathering of enthusiasts evidently pages.

There are a little analysis of pretend Fb profiles that time out that pretend profiles have prime reasonable selection of chums and most ceaselessly determine themselves as women. For selecting out whether or not or no longer a particular profile is faux these analysis.

Find Out FAKE PROFILE PICTURES on Facebook

Having a look at an organization Fb web page the other day I spotted an unnatural excessive number of fans for that form of company but strangely very low fan task on the same Fb web page. Only a few likes and no feedback made it a little of a strange case. I did to find a number of Likes though and made up our minds to have a closer have a look at these profiles. I came up with the following trick which will introduce you to an excellent and not that smartly-known function of Google.

Firstly, be suspicious if

1. They just have one image
2. Their birthplace is not within the U.S.
3. Their profile has conflicting information.
4. They're friends with tons of people you already know however no person knows he/she.

1) Go to the suspected profile.
2) Click on the profile image then click on the thumbnail to enlarge it.
3) At this level, the image is most probably inside of a clear Fb dialog box. You will need to refresh your browser so the web page reloads the image. As soon as the web page has reloaded, right-click (ctrl-click on a Mac) the image and select "view picture". This will be the exact URL of the picture. COPY this URL.
However, you need to use Fb's "download" picture link to download the picture to your laptop. Then you can upload it to Google Image Search.
4) Go to http://images.google.com/
5) In the box where you usually enter what to search for, you will see a bit camera icon on the right side. Click on it.
6) When you click on the camera icon, you will get the method to PASTE the URL of the suspected picture or UPLOAD it from your pc.

7) As soon as the search results are displayed, SCROLL DOWN past the "similar" photographs to look if the EXACT SAME picture has been discovered on porn websites, school humor websites, blogs, or different profiles.

In case you to find that the profile is in reality the use of photos from different websites, return to the fake profile, scroll down unless you see the "Report/Block" link in the left column and use it to REPORT whatever fool created the profile. NOTE: Some individuals have

legit causes to have their photos on different internet sites. Regularly this is lovely obvious as a result of they'll have the similar name, and others.
I benefit from Firefox as my default browser. Completely different browsers may match otherwise when you are seeking to get the URL of the image.
